

PSi

PRECISION STAMPINGS, INC.

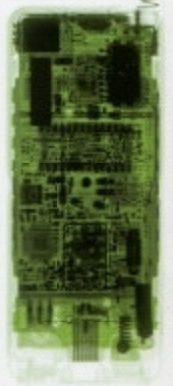

*Precision stamping for
micro-miniature, miniature
and medium-size
stamping applications*

Precision stamping for micro-miniature metal parts.

LEADING-EDGE TECHNOLOGY.

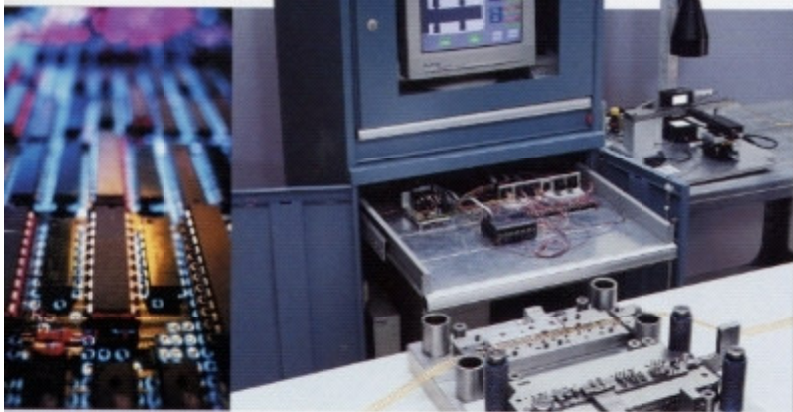

When you need micro-miniature metal parts, Precision Stampings, Inc. is your best source. For more than 30 years, PSi has designed, built and delivered a wide variety of contacts and other metal stampings. We use the latest stamping technologies, high-speed presses and inspection equipment to produce micro to mini progressive metal parts. As the leader in precision stamping, PSi has the capacity to get you the right metal parts, right on time. We have two facilities to serve you: Beaumont, California with 24,000 square feet of production space, and Concord, North Carolina with just under 10,000 square feet.

METAL STAMPINGS FOR YOUR APPLICATIONS.

These miniature parts are essential in technologies for the automotive, medical, computer, telecommunications and hardware industries. The intricate components we make are key elements in applications like anti-lock brake systems, fuel systems, telephones, computers and military equipment. Our engineers work with you to design the precise stampings you need, on state-of-the-art computers using the most updated software available. These designs give you consistent, high quality parts at competitive prices.

Wherever there's precision technology—such as computers, telecommunications, automotive, military and medical—metal stampings are essential.

PRECISE QUALITY ON EVERY REEL.

Quality is defined by precision at PSi. Even the most minute imperfection can shut down your product—and your reputation. Because we believe in a “One Quality System,” we meet ISO/TS16949 requirements throughout all processes. Our highly trained tool-and-die makers, inspectors and operators use the latest machinery to ensure the highest quality possible, and that all stampings are identical within a reel. The repeatability of our stampings means consistency in your products. We offer state-of-the-art machine vision systems that provide 100% part inspection as stampings move off the press. This guarantees 100% quality parts. With 500 -100,000 stampings on a reel, this is an important new option from PSi.
